## SOUND POLLUTION PETITION

According to the WHO (World Health Organisation) and Health Canada, noises exceeding 45 decibels can affect the concentration of students and also be a nuisance for neighbors close the school. During the day, some residents may be sleeping because they work nights, others may be sick, on vacation, retired, etc... It was noted that the overwhelming majority of car locking « beeps » exceed 4 to 32 times the acceptable 45 decibels norm.

The undersigned have agreed to reduce sound pollution that can affect the concentration of students at your school by eliminating noisy car locking « beeps » emited by their cars.

The undersigned are kindly asking the School management to help distribute folders and to post a sign to allow the employees and parents to take notice of this sound pollution.

We thank you for your cooperation.
