

THANK YOU! THANK YOU! THANK YOU!

We all like our neighborhood for its peacefulness. This is the reason why the vast majority of us do not use the noisy car locking « beep or chirp » that many car dealerships install on new cars to attract attention.

By deactivating or not using this system you will not wake up your neighbors at night. During the day it will prevent you from disturbing or waking up neighbors that are sick, retired, on vacation, mentally ill and disabled, babies, night workers that sleep during the day, etc. You will also not startle pedestrians, cyclists and passing motorists.

You already deactivated the noisy system? Great! Keep this leaflet for the windshield of the next car that will startle or wake you.
