

# Ticket Warning!

If you have received a ticket because your car « beep » exceeds the local noise by-laws (most of them do) we would like to know.

We do not think it is fair for you to have to pay a fine. Automobile makers should sell their cars like they do in many other countries by respecting the nighttime norm of 40 decibels as suggested by the World Health Organisation.

Make sure you do not get fined. If you received this leaflet, someone noticed that your car's beep is probably too loud. See if your car is on our listing with the corresponding decibel rating on our web site.
