

# BEEP! HONK!

The street is for everyone to use, but on MY piece of land and in MY house we do not want your sound pollution. We want to be able to study, work, read, sleep, recover when we are sick etc... without hearing « beeps », « honks » or « zwip-zwip » throughout the day and night. Now that you know that those sounds are annoying, please lock your car doors silently (see the car instruction manual or ask your dealer)

Do you really think that this noise is not annoying? Please go to [www.hornfree.org](http://www.hornfree.org) and write us your phone number. We will gladly « beep » you at random times during the day and night.
