

Dear neighbors,

Here is the car that woke you up at _____ AM because it's owner locked the car using a « Beeping » locking device

Yes, he probably could have done it silently by :

- 1- Using the key
- 2- Pressing the « door lock» button in the door.
- 3- Using the silent remote locking system (needs to look in the Owner manual)
- 4- Bringing the car back to the dealer who forced him to take this system in the first place, so that it can be changed for a silent system (with or without flashing lights)

Please note the licence number, date and time and call police to complain if he wakes you up again.
